

# COWLEY

SIXTH FORM COLLEGE

BTEC LEVEL 3 CERTIFICATE

## ANIMAL MANAGEMENT

### Teaching staff

Mr Jones  
Mrs Moran

### Overview

Across Year 12 and 13 you will study a range of practical units. You will learn about Animal welfare and Ethics, Husbandry, Behaviour, Health and Diseases and Work Experience in the Animal Sector.

You will be taught by an enthusiastic and caring team who are committed to ensuring you achieve and reach your potential. We are always developing and improving upon the work we do and the animals that we accommodate to keep the course fresh and exciting.

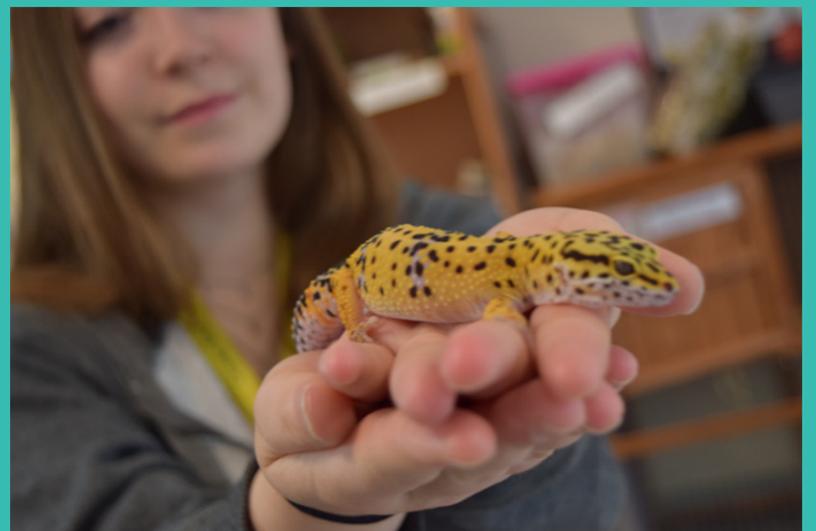

### What to expect during lessons

You will take part in a range of practically guided tutorial sessions to ensure you fully understand the concepts and techniques involved in meeting the welfare needs of the animals. We also utilise our own in-house video tutorials to enable students to work at their own pace and work independently in their study time.

You will have the opportunity to work with animals in our bespoke area as well as to work with livestock at local farms and liaise with local pet stores and veterinary practices to seek advice on animal welfare.

### Outside the classroom

You will have the opportunity to work with farm livestock, companion animals, exotic animals, zoo animals and British wildlife to prepare you for sector-specialist areas.

“Studying Animal care has given me new exciting opportunities when working with a range of animals.

It has allowed me to study Animal Behaviour further at University”

### Equipment that you will need

Basic stationery (pens, pencils etc).

Many students choose a variety of paths depending on their ambitions and aspirations. There are many different career paths and opportunities for those wishing to work in animal management, in areas such as animal welfare, business, science and wildlife conservation. If taken alongside A levels in Biology and Chemistry, it will allow for alternative progression routes into areas such as veterinary nursing.
